Agreement for Free Sewer-Relief Valve

Sewer-Relief Valves are available *free of charge*, one per customer, at the TUD office. TUD staff can assist you (*free of charge*) in locating your sewer cleanout and if not found, can identify the location where one should be installed. If a cleanout is not currently installed on your sewer line, you will need to make arrangements at your expense, to have one installed by your plumber prior to receiving your free Sewer-Relief Valve.

By my signature below, I agree to have the Sewer-Relief Valve properly installed on my sewer cleanout, and inspected by TUD (*free of charge*), within 30 days of receiving the Sewer Relief Valve. If within 30 days, I do not contact TUD for an inspection, I will be billed \$35.00 to my TUD sewer account to cover the cost of the Sewer Relief Valve.
